

## Radiological Consulting

The MJW Corporation maintains a comprehensive suite of radiological services that we are able to provide to our customers thanks to the exceptional education, training, and experience of our staff. MJW has nearly 30 ABHP Board-Certified Health Physicists who have worked throughout the national DOE complex and the nuclear industry in every facet of radiological protection from ALARA programs to supervision of technical staff. This affords MJW the unique ability to efficiently assess and solve the varied needs of our clients in a timely and cost-effective manner.
